

Identity Standard

For help and advice on Identity Standards contact: xxxxxx

Technical Protocols

Standard identity protocols will be used (eg, OAuth2, SAML, OID, OpenIDC)

Federated Identity

NSS identity may not be trusted by others who will issue their own

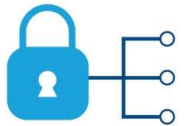

Access

will be enabled by identity and will be checked by different systems against roles/ profiles and policies

Audit and Reporting

Will be in place to ensure appropriate use

Single NSS Identity

Staff within NSS will have a single digital identity that will be unique
