

**Digital Design
Authority**

**Cloud
Standard**

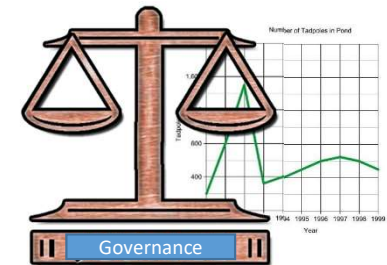

Cloud Standard

Find the full standard here: xxxxx
For help and advice contact: xxxxxx

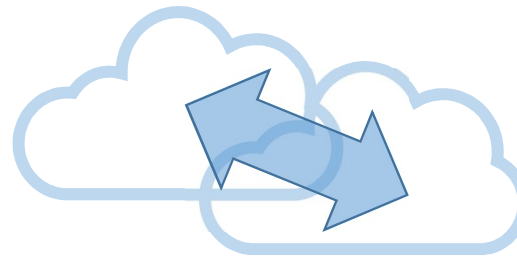

Profiles

Service profiles will be developed to allow for reuse of successful hosting approaches

Governance

With appropriate **metrics** will be in place to ensure appropriate use and financial governance.

Interoperability

Portability of services will be considered and where appropriate designed for portability and interoperability across providers

Security

We will build-in consideration of security in hosting practice (e.g. ISO27018)

Technical Protocols

Standards (e.g. ISO17788) will be used to describe services. Individual service elements will build on standards appropriate in those areas
